

VANFEST KEEPS THE DRUIDS BREWING

Many of you will have seen & heard **DRUIDS BREW** at the many VW events they attend all over the UK (and Europe). Looking at their faithful Split, "Pumpkin" you may well wonder how they manage to get to most of their venues.

Well so did we & if you talk to Tim he will tell you lots of wonderful stories, many of these have become a bit hazy & obscured by time and substance(s), but what will be clear (or not!) is that he has also (probably) lost count of the number of times he has had the engine out in bits or swapped it around, or the number of trips Pumpkin has had on the back of a recovery truck.

We at Vanfest have also noticed (some) of the struggles the Druids Crew have had and also recognise what an essential part of the VW Show Scene the Druids are. We have firm friends over the years, so much so that they are part of our Vanfest Crew which builds up and run the event each year.

So, determined that the Druids will be able to keep on brewing and sowing their spells at VW Gigs all over the country Vanfest has sponsored a new engine (From **REMTEC/ VW HERITAGE** for Pumpkin to ensure they keep all their wheels on the ground & turning. It was fitted in June & so far the new pot has not boiled over!.

DRUIDS BREW (AND PUMPKIN) WILL BE WITH US AGAIN IN SEPTEMBER AT VANFEST
